about a file * Linkunlink: Unlink a file * Linkrem: Remove a file * Linktree: Display the directory tree of a hard link * Linkmktree: Create a directory tree from a hard link * Linksearch: Display a list of all files that can be found with a given link target * Linkcopy: Copy a file to another file * Linkrmstream: Remove the original file and return a new file instead * Linkrename: Rename a file to another name * Linkrestartlink: Restart a link, i.e. reset all attributes and permissions of a file * Link

`\f[C]` Creates hard links in a directory tree. Example: `pvt hardlink directory-tree-path-to-hardlinks \f`

`\f[C]` Creates a directory of a new tree of hardlinks. Example: `pvt hardlink directory-tree-path-to-hardlinks c:new_tree \f`

`\f[C]` Copies a set of files and directories from one directory to another. Example: `pvt copy files-and-dirs directory-tree-path-to-copy-files directory-tree-path-to-copy-files \f`

`\f[C]` Copies all files and directories from a directory tree

into another directory tree.

Example: `pvt copy files-and-dirs`

`directory-tree-path-to-copy-files`

`directory-tree-path-to-copy-files`

`/hard \f] \f[C]` Changes the

ownership of a set of files and

directories. Example: `pvt change-`

`owner files-and-dirs directory-tree-`

`path-to-change-owner directory-tree-`

`path-to-change-owner \f] \f[C]`

Changes the group ownership of a

set of files and directories.

Example: `pvt change-group-owner`

`files-and-dirs directory-tree-path-to-`

`change-group directory-tree-path-to-`

change-group \f] \f[C] Sets the process work set size of a process. Example: pvt set-process-work-set-size process-name \f] \f[C] Sets the priority of a process. Example: pvt set-process-priority process-name \f] \f[C] Displays all commands and their options. Example: pvt \f] [A] \f[C] [/A] Aortic dissection after cocaine abuse: rare but treatable complication. Cocaine abuse is a significant risk factor for aortic dissection. We present the case of a 29-year-old woman who presented to the emergency department with

chest and back pain. Evaluation with computed tomography revealed an acute aortic dissection involving the ascending and descending aorta. Aortic dissection has been previously described after cocaine abuse, but most of these patients are symptomatic during their first cocaine-related infarct. The time interval between cocaine abuse and dissection has been reported to range from a few hours to months and this is the first case of a patient presenting with an aortic dissection after several years

of abstinence. The patient

System Requirements For Danger Tools:

Minimum OS: Windows 8 / 7 / Vista / XP
Processor: Intel Core i3, 2.4 GHz / AMD Athlon II X2
Memory: 4 GB Graphics: DirectX 9 compatible
Hard Disk Space: 1 GB
Maximum Processor: Intel Core i5, 3.0 GHz / AMD Phenom II X3
Memory: 8 GB Graphics: DirectX 11 compatible
Hard Disk Space: 10 GB
