Windows applications AutoCAD LT 2011 and 2013 provide support for Windows Forms and Windows Desktop Automation. AutoCAD LT for the iPad supports forms via Apple's iOS automation. AutoCAD LT for Android supports forms via native Android Automation. Windows applications based on AutoCAD LT version 2014 are capable of directly accessing the native toolbars. AutoCAD also offers an API to create desktop applications for the Windows platform. This allows a form-based user interface in a variety of languages, including C++ and.NET. iOS applications AutoCAD LT for iOS is built on Apple's native UIKit API, meaning it uses the same interface as iOS applications. AutoCAD Browser is a web browser-based application developed by Autodesk that is based on AutoCAD LT. JavaScript plug-ins AutoCAD LT 2005 introduced the JavaScript plug-in, which allowed users to interact with the core of AutoCAD LT from within a web browser. This is built on top of the Visual LISP framework, and therefore runs inside the user's web browser. It is also possible to build web-based user interfaces with JavaScript that connect directly to the AutoCAD LT APIs. The first release of AutoCAD LT 2010 introduced the ObjectARX JavaScript plug-in. It is a thin wrapper over the native AutoCAD C++ classes, which allows users to automate AutoCAD LT from a browser without writing JavaScript or installing additional software on the client's machine. ObjectARX is used within all AutoCAD LT products, including AutoCAD LT, AutoCAD LT Architect, AutoCAD LT Electrical, AutoCAD LT Mechanical, AutoCAD LT Civil 3D, AutoCAD LT Geospatial, AutoCAD LT Construction, AutoCAD LT Animation, AutoCAD LT Visualization and AutoCAD LT Electrical and Mechanical. AutoCAD LT 2011 introduces the JavaScript plug-in, which provides native support for AutoCAD LT within JavaScript developers' standard libraries. This is accomplished by using the native Visual LISP language and providing access to the AutoCAD LT C++ API. AutoCAD LT 2013 introduces the JavaScript plug-in, which allows users to build forms and automate them from ca3bfb1094
