R600.Q: Define if a List is Empty, using Linq Is there a simple way to define an if-statement on a linq query without creating a new list? Is this possible: IEnumerable u = _db.Entities.Select(c=>c.SomeId); if (u isnt new List) { int k = (from x in _db.Entities select x.SomeId).Distinct(); if (k > 100) { //Do stuff... } else { //Do stuff... } } else { //Do stuff... } A: What about: if (_db.Entities.Any()) { int k = _db.Entities.Select(x=>x.SomeId).Distinct(); if (k > 100) //Do stuff... else //Do stuff... } A: You can use Any: IEnumerable u = _db.Entities.Select(c=>c.SomeId); if (!u.Any()) // is empty { // do something else } Otherwise create a new List and compare with equality: if (!u.ToList().SequenceEqual(new List)) // is new World's Dumbest: Chico's Gets Away With Murder Chico's got a history of getting away with murder. It has been a long, bloody fight. The road traveled has been about as intellectually honest as it comes, populated by a much-maligned but courageous wing of the conservative movement—one in which it's often forgotten that the rage against public schools all but always has been about the presence of minorities—and its ideological antithesis: the New Public School (NPS), which in recent years has become one of the leading institutions of its kind. The NPS initiative first became popular among conservative Christian activists during the late 1980s. Some of the earliest influential and evangelical leaders were Paul Weyrich and Martin Crutcher. They first teamed up as the founders 1cdb36666d

Notice that Fitz quickly heads towards the sideline while getting hit. Not sure what happened to Fitz, but the Texans have a lot of trouble with Roethlisberger's arm and hand when it's not there. They're always dipping underneath, and Roethlisberger and Portis don't hold hands throughout the play, which is when they can really drive. Edited by jhomer10, 29 November 2005 - 10:07 AM. The Following User Says Thank You to jhomer10 For This Useful Post: but it's interesting to me that he's definitely doing some things to protect him.. He drops the play.. He is forced to run in the opposite direction away from the pocket for fear that he won't make the play.. He doesn't trust that his athletic ability will carry him through a longer pass. He expects a pick to spring him free. He somehow manages to get in the endzone. I think that the pass is doomed the moment it leaves Roethlisberger's hand. If Hoyer had done a better job at sticking with the ball or getting his eyes downfield before the ball even left the QB's hand, I think there would have been no hope of anything getting completed.. and yet somehow they managed to pull it off.. yeah I know but it's interesting to see how a QB can be so accurate and yet he can't pull off such a simple throw every time... we play each other next week in Detroit...will be fun..I will say this though...he is the best I have seen not only in the NFC but in all of football this year...I think he may just be the most complete..good luck to the steelers next week the's a lot of stuff going on today other than Roethlisberger's arm.
