Try this: `$(function(){ $("#price").keyup(function(){ var val = this.value.replace(",","."); $("#price").val(val); }); });` jsFiddle Q: When we use `□□□`, why we must use a verb ending in `□□` (inflection)? Here, my friend quoted as `□□□` is not correct grammar. I'm confused that what's the meaning of `□□□`. Is it that to do something we can't use for example: `□ □□□ □□□` - I can't do something and I'm thinking that I'm the c9d1549cdd

The U.S. military entered the War on terror with more than 900 troops in Iraq and was planning a force of more than 140,000. After all the combat is over, and the casualties are counted, the exact size of the military force in Iraq is expected to be closer to 45,000 men (The casualties in Afghanistan may be even higher and include Army and Marines who were not in Iraq (Iraqi civilians).
