Imagine the following scenario: A sales manager is tasked with giving a presentation that describes his company's specific value proposition to a prospect. He prepared a well-crafted presentation that demonstrates exactly the key points and features of the company and its solutions. The prospect was excited and the deal could be closed right away. However, once the sales manager gets up to give his presentation, he was struggling to remember the key points and features of the company. He felt like he was preaching to the converted and had no compelling story for his prospects. In one of the last presentations before his company gets sold, the sales manager presents the new company to a new market and, of course, he completely forgot the key points and features his company has to offer. The deal was promptly lost. If the situation seemed a little too realistic, it's because of a study called the Arctic Circle Effect. Rochelle Wurm - Director of Product Marketing for G Suite - explains the Arctic Circle Effect and how it can cause you to lose your train of thought. She also gives practical tips that can help you make

sure you are always prepared to deliver your best, even if you feel a bit rusty, since “failing to prep is failing to deliver”. Is your company dealing with the Arctic Circle Effect? If b7e8fdf5c8

If you want to collaborate more efficiently, you need the right tools for the job. Microsoft Whiteboard is a cloud-based online tool designed to replace physical whiteboards, so that multiple people can work together on the same digital canvas. All the input, actions, and settings of a traditional whiteboard are available at your fingertips, so everyone can work together on the same doc. Built with collaboration in mind Microsoft Whiteboard supports simple touch, pen, mouse, and keyboard input, so you can all work together on the same document. There are several unique collaboration features to ensure that no single person gets left out. You can invite anyone to collaborate by just providing a URL and enabling web sharing. All participants who have access to a particular whiteboard can work together and make changes in real time. Evernote celebrates the second birthday of its mobile apps on Tuesday with the rollout of enhancements for the iOS and Android platforms. Users will be able to set up reminders in the app, sync with Evernote Web and resume a new note or edit. Syncing will also be faster and more streamlined on both iOS and Android, Evernote says. "We want Evernote to be the product you use to capture and remember the moments of your life in the most effective way possible," says Bob KuperSmith, Evernote CEO. "These updates make it easier and more efficient to do just that and we hope our users will love them as much as we do." The app also marks the release of Evernote 6, a new version of the software released in January. A month after moving to New York, Adam Orenstein has bought himself a 3-bedroom apartment on the top floor of a 1990s high-rise near the Empire State Building. He planned to stay there for a year or more. For now, he's happy in his new digs. "I didn't have a lot of furniture when I moved in and I've been slowly adding to it. Now I have a custom built kitchen island in the living room and I'm looking for a bed." He has a space about the size of a college dorm room with kitchen and shower. It's not the kind of place you'd expect someone like Orenstein to live, given that he makes money from computer screens. Instead, Orenstein's a self-described "digital nomad" who travels from mountain retreat to Hawaiian surf spot, back to a rented home

What's New In Microsoft Whiteboard?

A Google Chrome extension that makes Google Maps an even better navigation tool Building a new website is no easy feat, but Google has made it even harder. By now, you've probably heard about Google's New Map Feature, which can be accessed by typing in "maps" when you're using the Chrome browser. The feature was released in October 2016 and has had a lot of developers excited about how good it is. Instead of mapping it onto the page directly, it's provided a brand new panel that occupies the Google search bar area. This gives the developer more room and control over the design of their site. It's also more intuitive for the end user, meaning you can access Google Maps without having to open a separate window, search the web, or log into Google to access your map. It's great for developers, but this Google extension may also be suitable for your personal navigation needs. Here's how to get it First, you'll want to make sure you have the Google Maps tool installed on your Chrome browser. There are a number of ways to install the extension, but it's pretty simple. Just start by searching for "extensions" when you're inside the Chrome browser. It's highly likely that you'll find the extension by searching for Google Maps in the regular Chrome search box. Click on the extension and it will appear in the Chrome menu and you can select it. Select "Install Now" and your Google Maps extension will be activated automatically. Google Maps: The app you're looking for Now that you have the extension, you can get started. Assuming you have a pretty standard layout for your website, the first step will be to position the panel on the page. It should look something like this: Scroll down to the bottom of the page and you can select "New Maps." This will bring you to a new navigation panel on your website. So what's cool about Google Maps, apart from the fact that it's integrated directly into your Chrome browser? It lets you download a map for offline use (which is pretty useful if you're on an airplane or an unreliable wifi connection). There's also a new 

System Requirements For Microsoft Whiteboard:

===== The Secret Stash is another classic title from the Looney Tunes series. It's one of the first games to use a first person viewpoint and is one of the few games to be made for the PlayStation. So I've done my best to make it a realistic game, while keeping the art style of the original cartoons. It features two different modes of gameplay: co-op and single player. I've included a single player mode with a sandbox style feel to it. The co-op mode plays out like a more hardcore version of
