Cristal Mohan is a Malian contemporary artist. She began working on a series of pen and ink drawings known as Free Horses in 2011 and has been working on other series since then, published in 2014 under the title *From the Pen of a Dreamer*. The Castle Archives special issue, which features her series *Castle of Peril*, is a poetic child of the cities, places and people she inhabits. The *Castle of Peril* is a fictional metropolis where she offers intimate spaces reminiscent of earlier architecture, with invisible places, where only the eye of the dreamer can see. A land renewed by the accident of abandonment and partial destruction, a place of the dead and the living, and it gave birth to the story of *The Black City Gate*.

Reviews Originally posted by mrburns It's just a massive online RPG that operates by the same formula as Final Fantasy Tactics and Everquest, where you need to grind to get better equipment and resources. While there's certainly much more to do in the game, it's not a game that I'd really call "long-term" or "deep". It's a very shallow game where you battle for resources and then use those resources to create more and more. Final Fantasy Tactics already covered this ground (though I didn't realize it at the time), and it really doesn't do much more than just plain rehash the same ideas. I'd be interested to see a similar game that hooked me, but was actually fun to play. It's not just the grinding that annoys me; it's the whole setup of the game, and your character. First, you start with a little kid-looking character, and then when you level up you just get a massive 5-foot-tall version of the kid you started the game as. It's kind of a shame, because the character design of the kid is quite good, but it only seems to evolve as far as the name changes. I probably wouldn't even bother with it because of that, but it's not just that. As a kid, the grown-up I started the game as didn't even resemble my real-life self. As someone who's both old enough to have played the game (as well as know how much better modern games are at character modeling and design), I don't even want to play as a kid. Grind, grind, grind to level up, grind some more to level up... Grinding, grinding, grinding some more and... Before I hit level ten I made a fire spell that healed my party And when I leveled
