

The aim of HyperMotion Technology is to capture an authentic football experience for players and fans, giving new dimensions to tactics, player control, ball possession and more. FIFA 22 also comes with a unique new camera system, Be A Pro, giving players an unique insight into what it's really like to play football like a pro. Using an augmented reality system, Be a Pro allows players to wear a set of special headsets that overlay goals, crosses and off-ball events, on-screen, on the pitch. So they can get a unique view of how to successfully complete a move, or shoot. For the first time, players are able to track rival players' positions by creating a dedicated Be a Pro system for each player on the pitch. The FIFA Ultimate Team card pack for FIFA 22 will also feature over 180 brand new players, more than ever before in FIFA Ultimate Team, including the likes of Lionel Messi, Cristiano Ronaldo and Neymar. New dribbling and movement mechanics offer greater strategic depth in how you create opportunities. an EVEN MORE AUTHENTIC MODEL You know it, you love it, you hear it everywhere—the FIFA model is back.
