Below is the download information for the zte k3772 firmware for your specified K3772 device. Please save the ZIP file to your PC and extract the contents to a safe location on your computer, then plug in the USB cable to the back of your device. Once we find a known working firmware for the K3772, we then need to locate the files that are named with all the tokens that make up the firmware filename, such as the product, vendor, firmware version, product code and the ISP-specific suffix. Try downloading firmware from other sources to see if any of them match those clues. Once we located the correct firmware for K3772, we will then need to download the firmware files from the Vodafone Wi-Fi Hub. If you are going to install the firmware manually on your modem, then you should have a USB cable plugged into a USB port on your computer. If you are simply trying to download the firmware to your modem for later use, then a temporary connection to the modem will be fine. Vodafone has recently launched new k3772 a 7.2mbps modem in various countries, k3772 has having a new IMEI series which support to Huawei new algorithm to generate the unlock codes so you can use our online Huawei code calculator to generate the codes for free.
